Having a tiny floor plan doesn't mean you can't live large. To open up spaces, interior stylist Priscilla Tan (@stylebypt) recommends sticking to smooth and even wall finishes; going for a larger-than-life effect with contrasting colours and textures — think dark walls and light furniture or vice versa — and opting for big floor tiles measuring 60cm x 120cm or even 90cm x 90cm.

"Always measure the space before buying furniture or fittings. It's not rocket science, but some still fail to do so," she adds. "And for inspiration, check out Pinterest or Instagram for small space hastags on how to dress up corners."

### 打造精彩家居空间

房子面积小，并不表示你在装修时就无法玩出新意。要让房子看起来更加宽敞，室内设计师 Priscilla Tan（@stylebypt）建议让墙面保持光滑平整，但通过对比色系和材质，让小空间也别有洞天。例如深色墙壁搭配浅色家具或选择60公分x120公分，甚至是90公分x90公分的大块地板瓷砖。Priscilla 说："在选购家具或配件前一定要先量一量空间大小。这并不是深奥的学问，但却往往被许多人忽略了。若需要家居装饰灵感，不妨参考Pinterest或Instagram，尤其是标上"小空间"标签的贴文，看看他人如何布置各种角落。"
